Software Solutions For You

4iware

Who is 4uWare ?

4uWare was born from the collaboration of four independent IT experts in software development

Why 4uWare ?

- pooling of knowledge and experience
- efficient task allocation
- larger projects
- ensure continuity for customers

What is our knowledge?

- data conversion and migration
- custom software development
- web applications, design and hosting
- mobile applications
- front and back office systems integration
- publishing software

Who are our customers?

Small, medium and large enterprises
Multinationals

What we offer the customer?

- streamline your processes
- improved mobility of your employees
- automation of new business
- optimize your current processes
- visibility to the outside of your firm (SEO - search engine optimization station)

How do we work?

Fase 1

- Capture current processes (business requirements)
- Writing functional analysis

Fase 2

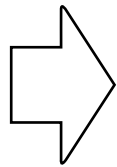

- Price estimate technical analysis and proof of concept
- Implementation of technical analysis with proof of concept
- Capture cost and time estimates for the project

Fase 3

- development and delivery of the project
- writing technical and user documentation
- maintenance and upgrade of the application

What technology do we use?

- .NET
- 4uware webengine
- OXS - Online XML Storage developpement platform
- ICE - Integrated Collaboration Environment
- Drupal - Open WEB CMS
- OVH - Webhosting
